Network Connectivity Leader *PANDUIT* Corp Releases New Full-Line Catalog

Fiber Optic Solutions Highlight Continued Innovation and Growth

Tinley Park, IL, May 17, 2007 – *PANDUIT* Corp, the acknowledged world leader in innovative network connectivity solutions, has released its largest Electrical Solutions Full-Line catalog to date, at over 900 pages. The book is expected to become the new go-to source for both individual electrical/network products and complete connectivity solutions.

Timothy Novak, Marketing Director at Graybar, a major Telecommunications distributor, said, “We’re really excited about the new book. We’ve always loved working with *PANDUIT*, but this will make the job even easier. The Solutions Roadmaps are especially great. Our distributors can show this to any contractor or Data Center manager and point out product combinations that will meet his needs perfectly.”

Already noted for its fiber optic innovations, *PANDUIT* is solidifying its lead in the field with the synchronized release of several new fiber connectivity products featured in the catalog, including a new line of LC Fiber Optic Connectors. *PANDUIT* plans to continue the focus on fiber optics and network connectivity with more new fiber product releases in the next month.
